PRODUCT DESCRIPTION

A water-based, antifungal, and anti-mold plaster engineered with natural additives, fillers, and pigments to create a polished marble-like finish for interior walls and ceilings. It provides moisture resistance, abrasion resistance, easy cleanability, and low odor for durable, elegant surfaces.

SURFACE PREPARATION

All substrates must be thoroughly dry, structurally sound, and free of contaminants including dust, loose material, grease, oil. Prior to application, all surfaces must be properly primed with Peacock Latex Primer Sealer to ensure optimal adhesion and a uniform finish.

COVERAGE

1-1.2Kgs/Sqm

APPLICATION

Apply a first coat until the surface is fully covered and allow it to dry for at least 6 hours. Smooth the dried surface with a steel float or 300–500 grit sandpaper to remove imperfections, then apply a second coat and allow it to cure for 24 hours before sanding with 500 grit paper. For the final coat, apply the material unevenly, leaving some areas unfilled to create depth, then sand with 1000–1500 grit paper until perfectly smooth. Finish by applying wax in circular motions with a cloth and buffing to a polished, marble-like effect.

MAINTENANCE

Clean the surface with hot water and liquid detergent to remove stains, allow it to dry, and apply protective wax. For damaged walls, repaint faded stucco areas to restore color intensity, repair cracks with undercoat putty, smooth the surface to ensure homogeneity, and reapply the full stucco application process.

PACK SIZE

4 Kg, 20 Kg

STORAGE

Store this product in a cool dry place, out of reach of children.

DISPOSAL

Dispose of paint at designated waste facilities or community collection events.

FOR PROFESSIONAL USE ONLY.
